NOTICE

TO ALL ROOFING CONTRACTORS

Effective October 1, 2006, all re-roofs will require an in progress and final work inspection of work, to insure code compliance. The in progress inspection should be requested and scheduled while roofers are present and working on the project, but prior to completion. In some cases, the inspector at his discretion, may be able to confirm code compliance and approve both the in progress and final inspection at the same time. Other cases may require a final inspection upon completion. An inspection request code specifically for the in progress inspection is being added to our system so that the inspections may be scheduled using the IVR system. Failed inspections must be rescheduled and a \$35.00 fee (effective 12/10/2007) will be assessed.

Should you have any questions or need additional information regarding this notice, please contact the Building Division. We appreciate your cooperation and compliance with the above, as we strive to safeguard the health, safety and welfare of our citizens through compliance with the minimum code requirements.

Jim Legee, Building Official
