www.polk-county.net/building

You have been issued a building permit for a property located in a flood hazard zone. In accordance with the Polk County Land Development Code, Chapter 6, Section 630, and Federal regulations, your lowest floor elevation must be one foot or more above the Base Flood Elevation for numbered A zones, or three feet above the highest adjacent elevation for unnumbered A zones.

In order to obtain a lintel inspection (concrete block construction) or a framing rough inspection (wood frame construction), a FEMA elevation certificate completed by a Florida registered surveyor or engineer, and showing that your floor elevation meets this requirement, must be submitted. A fax copy of the elevation certificate will be acceptable to release the lintel or framing inspection, but an original will be required before a certificate of occupancy (CO) can be issued or power can be released.

I _____ (print applicant name) have read and understand the above.
